The Online Computer Based Examination may be conducted in multiple sessions. Whenever Online Computer Based Examination is conducted in multiple sessions based on the same syllabus, same pattern for candidates having same eligibility criteria, the raw marks obtained by the candidates in different sessions will be converted to normalized marks. A candidate will be permitted to appear only in one session.

In case if there is only one session, actual marks obtained by the candidates will be used for calculating the merit list.

iv. **Calculation of normalized marks for multi-session papers:**

In case of multi session papers, a suitable normalization is applied to take into account any variation in the difficulty levels of the question papers across different sessions.

The following Normalization formula for calculating the normalized marks for the multi-session paper is adopted as followed in various Competitive Examinations in India.

Normalization mark of j^{th} candidate in i^{th} session \widehat{M}_{ij} is given by:

$$\widehat{M}_{ij} = \frac{\overline{M}_t^g - M_q^g}{\overline{M}_i - M_{iq}} (M_{ij} - M_{iq}) + M_q^g$$

M_{ij} : the actual marks obtained by the j^{th} candidate in i^{th} session.

\overline{M}_t^g : the average marks of the top 0.1% of the candidates considering all sessions.

M_q^g : the sum of mean and standard deviation marks of the candidates in the paper considering all sessions.

\overline{M}_i : the average marks of the top 0.1% of the candidates in the i^{th} session or marks of topper if session strength is less than 1000.

M_{iq} : the sum of the mean marks and standard deviation of the i^{th} session.
