DETAILED SYLLABUS OF PART A

Particulars	Syllabus - General (Part A)
General Knowledge	 Facts about India and other countries: Basic facts / Geography / Tourism / Transport systems / Personalities / Places / History / Constitution / Economy / Writers / Literatures / Indian States & Union Territories / International Organizations. General Science : Branches of studies / Scientific instruments and appliances / Physics / Chemistry / Biology Sports & Games Important Events/ Movements / Leaders / Places / Years Writers – Authors – Biography - Autobiography Abbreviations
General English	• Spotting Errors / Vocabulary usage / Sentence Completion / Synonyms / Antonyms / Reconstruction of sentences / One word substitution / Idioms & Phrases / Grammar / Correct usage of Articles / Prepositions / Singular and Plural
Reasoning	Analogy / Classification / Series Completion / Coding-Decoding / Blood Relation / Direction Sense Test / Alphabet Test / Number and Ranking / Puzzle Test / Odd Man out / General Intelligence
Quantitative Aptitude	 Number system / Fraction and Decimals / Simplification / Volume and surface areas / Square roots and Cube roots / Problems based on numbers, Speed, Time and Distance, Simple Interest / Compound Interest / Boats and Streams / Problems on Trains / Percentage - Interest / HCF and LCM / Average / Ratio and Proportion / Time and Work / Problems based on ages / Profit, Loss and Discount, Statistics / Permutations & Combinations / Probability.

DETAILED SYLLABUS OF PART B

Post	Name of Post	Syllabus - Discipline related (Part B)
Code	Targing Machainel	
A1 to A4	Junior Technical Assistant	Attached as Annexure II
A4	[Mechanical, Electrical,	
	Electronics, Civil]	
A5	Junior Commercial	Office procedures, office correspondence,
	Assistant	• Record keeping and maintenance of files, Act and
		Regulations,
		• Use and application of computer in office, Data entry,
		computer network, computer devices, operating
		systems, Windows, MS Word, MS Excel,
		Computer maintenance,
		Office stationery, paperless office,
		• ERP,
		• Duties and responsibilities of Commercial Assistants,
		• E-commerce,
		Environment,Communicative English,
		 Business Communication,
		Accountancy,
		Desktop Publishing,
		Data storage,
		 Cyber security
A6	Store Keeper	Theoretical and application knowledge on
	-	A. Stores /Warehouse Management
		• Objectives , Functions & responsibilities of Store
		keeping
		Types of Stores
		Storage Systems & Layout
		• Store Management Functions - processes and
		procedures
		 Storage of hazardous materials and its management Category Management- classification and codification
		 Stock Verification Methods
		 Material Handling Methods and Equipments
		 Importance of Documentation
		B. <u>Inventory Management</u>
		Functions of inventory
		Classification of inventory
		• Costs associated with inventory
		• Inventory control methods (like ABC, FSN, VED
		analysis etc)
		C. <u>5S Methodology of housekeeping</u>
		Objectives and importance
		• 5S in practical applications
		D. <u>Computer Literacy, MS Office & E-mail</u> (2007 & higher
		versions)
		Windows Basics

Post Code	Name of Post	Syllabus - Discipline related (Part B)
		 MS Excel Basics MS Word Basics Email – basics and applications
		 E. <u>ERP - Basics</u> Objectives and importance Functions Different ERP Systems like SAP and relevant modules
		with reference to material procurement F. <u>ISO 9001, 14001 & OHSAS 18001</u> - Objectives and importance G. <u>Customer Relationship Management in stores</u> -
A7	Welder Cum Fitter (Mechanic Diesel)	Basics, Objectives and importance, Applications Theoretical and application knowledge on • Tools - Bench wise/Files etc
		 Marking and measuring tools Limits/Fits/Tolerance Numerical ability – Mass/Volume/Density/unit conversion/unit system Shaft alignment Erection & commissioning of equipments Valve timing/Tappet clearance Decarbonising Fasteners and torque tightening Engine systems Engine type and functions I/C Engines and its parts Types of bearings and its uses Safety procedures /First aid Types of material handling equipments
A8	Fitter (Electronics)	 <u>Theoretical and application knowledge on</u> Difference between conductor, insulator and semiconductor RC, LC and RLC circuits.
		 Symbols , working principle and applications of various electronic components like diode, transistor, zener diode, ,SCR,UJT,FET, Diac, Triac, MOSFET,IGBT. Half wave and full wave rectifier circuit , Filter circuits and Ripple factor. Single stage and multi stage amplifier and types of signal.
		 Boolean Algebra, Logic Gates, Truth tables and Flip Flops Fundamentals of DC motor, slip ring and squirrel cage induction motor
		 Speed control of AC/ DC Motors DOL ,star delta and Soft starters Concept of DC drives and AC drive(VFD) PLC and ladder logic basics, Microprocessor controls & I/O Devices

Post Code	Name of Post	Syllabus - Discipline related (Part B)
Code		 Concept of CCTV and Networking Power supply, SMPS and UPS Navigation and Communication Equipments: GMDSS, Gyro compass, Radar, Echo sounder, GPS and DGPS, Doppler log, AIS, Steering control(Autopilot), various types of Antennas and Band of Frequencies. PA system, Talk back system, EPABX Fire alarm system – Conventional and Addressable types Testing/Measuring Instruments like Oscilloscope, Function generator ,Spectrum analyzer, Tachometer, Tong Tester and Megger Calibration of measuring instruments like Voltmeter, Ammeter, KW meter ,Power Factor meter, KWH meter, insulation meter Battery chargers and Batteries, Serviceability checks &Capacity test of batteries. ICCP controls ,Anodes and Reference Electrodes Dynamic Positioning systems. DA/AD converters Different types of Proximity switches ,Level switches, Pressure switches &transmitters Photo diodes and photo transistors, RTD's and Thermocouples Tacho generators and Encoders Need of modulation and de-modulation, Type of modulation, Radio transmitter and receiver Advantages of FM over AM SSB receivers. Satellite communication and micro-wave communication Positive and Negative Regulators using IC's Oscillators, PLL's and Synthesizers Op-Amps using IC 741 Timers using IC555 LCD/LED Displays TV Receivers and Hb systems. Dish TV systems Electronics in Welding sets Various braking systems used in cranes Speed control of LLTT cranes Requirement of AVR's in Alternators Safety measures while handling Electrical and Electroics
A9	Fitter (Electrical)	Soldering and De-Soldering Techniques Theoretical and application knowledge on
		Fundamentals of electricity: various laws of electricity
		and its applications, Basic electrostatics & electro dynamics, primary and secondary cells, magnetic and

Post Code	Name of Post	Syllabus - Discipline related (Part B)
		capacitive circuits, power and power factor, polyphase
		system, measuring instruments, measurement of power
		and energy. Electrical appliances and wiring:
		 domestic appliances- lighting, various types of lamps,
		wiring circuits
		• domestic and industrial, earthing, regulated power
		supply, maintenance of domestic appliances, IEE rules.
		Electrical machines: D.C generators & DC motors-
		characteristics and applications, speed control and
		testing, transformers& autotransformers- losses and
		testing, alternators, single phase 3 phase motors, starter and internal connection diagrams.
		Basic electronics: active and passive electronic
		components, rectifier circuits, characteristics of
		transistors, amplifiers, OPAMP, oscillators, types and
		application of SCR,UJT, TRIAC, DIAC, microprocessor etc,
		digital electronics. Winding of machines: fundamental terms used in
		windings, winding of transformers, motors, armature
		winding, material used, and method of connection.
		Electrical Switchgear: principle, operation & application
		of Fuses, MCCB, Protective relays, ELCB.
		• safety for handling electrical equipments/ wiring/ applications
		• statutory requirements while handling electrical applications
A10	Shipwright Wood	Theoretical and application knowledge on
		Wood working terminologies - Wood working machineries
		(portable & stationary) – its application & routine
		maintenance. Various hand tools- measuring instruments for wood working and its relative advantages – Wood
		preservation & seasoning- Timber identification – Defects
		in timber – Understanding measurements & tolerances –
		Knowledge of various wood working joints, furniture
		fabrication appropriate application and their relative
		merits & demerits – Knowledge of laminate material,
		hardware items, & its relative merits – Application of adhesives & finishing agents – Knowledge of modern
		modular assembly & interior architects and model
		developments & docking including block setting in marine
		field (Both new building projects & repair).
		Industrial Safety
		Awareness on Safety & PPEs - Importance of house
		keeping

Post Code	Name of Post	Syllabus - Discipline related (Part B)
A11	Semi Skilled Rigger	Theoretical and application knowledge on
		• Rigging Procedures and Practices - Types of loads and
		its lifting ,Measuring units, sign boards, lifting drawing
		/ symbols, Tag Lines, Lifting Points, Types of lifting
		slings / ropes, Rope Reeving, knots and splicing.
		Different types of hoist mechanisms
		• <u>General awareness of Cranes</u> - Different types of
		Cranes, understanding of crane dynamics including
		swinging, raising, lowering, stopping loads and boom
		deflection.
		• <u>Communication-</u> Hand Signals - Communication using Walkie Talkie.
		• Lifting Criteria - Centre of Gravity, Effect of sling
		Angles, Personnel lifting, rope dimensions etc.
		• Rigging Equipment and accessories - Chain blocks,
		chain lifters, Jacks, Ropes, belts, slings and other
		lifting tools & Tackles.
		• <u>Safety Rules and Measures</u> - Safety associated with all
		Rigging activities, Hazard identification and its
		elimination, Emergency procedures, fall protection.
		 Types of material handling equipments
A12	Fireman	Theoretical and application knowledge on
1112	Fileman	Basics of Fire, Fire Prevention, Fire Fighting, Salvage
		 Physics and chemistry of fire
		• Different types of fires
		• Indian Standards relating to Fire Fighting Equipments
		and Appliances
		Fire service hydraulics
		Plan reading
		Passive and Active fire protection systems
		Hose and hose fittings
		Branches and nozzlesLadders
		Pumps and primers
		 Portable fire extinguishers construction, performance
		& maintenance
		Foam and foam making branches
		• Fixed fire fighting installations
		 Respiratory supporting systems in fire fighting(SCBA, ELSA etc)
		 MSDS awareness (Hydrocarbons, chemicals)
		• Storage requirements and classifications for Hazardous
		goods, Explosives, Petroleum etc
		 Electricity – Concepts, safety
		• Different types of extinguishing media.
		Practical fireman ship
		Automatic Fire detection and alarm systems
		• First aid, Resuscitation and CPR

Cochin Shipyard Ltd.

Post Code	Name of Post	Syllabus - Discipline related (Part B)
		 Sprinklers and drenchers Basic knowledge on NBC part-IV requirements. Important rescue tools and its use Global warming and environmental protection- green house gases, ozone depletion, new technologies in firefighting. Clean agent fire fighting system – operation, maintenance & salvage.
A13	Junior Safety Assistant	 Theoretical and application knowledge on Safety principles : Hierarchy of controls, Accident triangle, accident Investigation. Working Conditions : Hot work, Confined space, Work at height management. PPEs and Safety gadgets : Standards, PPEs for the activities. Fire : Fire prevention and fire fighting.

-		
1.	Manufacturing Processes	(a) Casting
		(b) Forging
		(c) Rolling
		(d) Extrusion
		(e) Machining including surface
		finishing
2.	Welding	(a) Types of welding
		(b) welding defects
		(c) Testing of welds
		(d) Brazing and soldering
3.	Theory of Machines and Machine	(a) Fundamentals and types of
	Design	machines
		(b) Common mechanisms
		(c) Cams and followers
		(d) Common transmissions
		(e) Flywheels and governors
		(f) Brakes, dynamometers, clutches
		and bearings
		(g) Balancing and vibration
4.	Thermal Engineering	Energy sources
		Fundamentals of thermodynamics
		Ideal gasses
		Steam turbines and condensers
		Heat Transfer
5.	Applied Mechanics	(a) Forces and moments
		(b) Friction
		(c) Centroid and Centre of Gravity
		(d) Simple machines, pulleys, blocks
		and wheels
		(e) Kinetics
		(f) Kinematics
		(g) Work, power, energy
6.	Metallurgy and Material Properties	(a) Physical, Mechanical, Thermal,
		Electrical, Magnetic Properties etc
		(b) Effect of heat treatment
		(c) Surface hardness and hardening
		(d) Corrosion
		(e) Testing of metals
		(f) Lubricants and their properties
7.	Strength of Materials	(a) Stress and strain
• •		(b) Bending and shear forces
		(c) Bending and shear stress
		(d) Moment of Inertia
		(e) Torsion
8.	Fluid Mechanics	
0.		(a) Properties of liquids(b) Fluid dynamics
		(c) Classification of fluids
		(d) Laws related with fluid flow and
		dynamics
0	Degie Commenter Argelie die se	(e) Turbines
9.	Basic Computer Applications	(a) Hardware and software
		(b) Operating systems and applications
1		(c) Internet

10. Basics of Electrical Engineering and Power Generation (a) Electrical power generation, transmission and distribution (b) AC fundamentals (a) Construction and functioning of an advisor of the second distribution (b) AC fundamentals (c) Measuring instruments (d) DC motors (e) AC appliances (f) Utilisation of electrical energy (e) Electrical safety (f) Utilisation of electrical safety 11. Industrial Management (a) Management process (b) Organisational Management (f) Human resource management (d) Material Management (e) Human resource management 12. Metrology and Instrumentation (a) Classification of instruments - range and span, accuracy and precision, reliability, calibration, hysterisis and dead zone, drift, sensitivity, threshold and resolution, repeatability and reproducibility, linearity, speed of response, fidelity and dynamic errors, overshoot. (b) Measurement of error- classification of transducers- active and passive, resistive, inductive, capacitive, piezo, resistive, inductive, capacitive			Annexure II - JTA
(b) AC fundamentals (c) Measuring instruments (d) DC motors (e) AC appliances (f) Utilisation of electrical energy (g) Electrical safety 11. Industrial Management (a) Management process (b) Organisational Management (c) Human resource management (d) Material Management (e) Human resource management (f) Metrology and Instrumentation (a) Classification of instruments - range and span, accuracy and precision, reliability, calibration, hysterisis and dead zone, drift, sensitivity, threshold and resolution, repeatability and reproducibility, alibration errors, overshoot. (b) Measurement of error - classification of errors, environmental errors, observation errors, operational errors, observation errors, operational errors. (c) Transducers - active and passive, resistive, thermo resistive (d) Specification, selection and application for pressure, temperature, flow, humidity, displacement, velocity, force, strain, sound. (e) Control Systems (f) Measurement of displacement, flow, temperature, strain, miscellaneous. (g) Limits, fits, tolerances and gauges (h) Scretw thread measurement (i) Turbines (c) Transes (d) Turbines (e) Control Systems	10.	Basics of Electrical Engineering	(a) Electrical power generation,
(c) Measuring instruments (d) DC motors (e) AC appliances (f) Utilisation of electrical energy (g) Electrical safety (e) Management process (f) Organisational Management (c) Human resource management (d) Material Management (e) Material Management (f) Hutrology and Instrumentation (a) Classification of instruments - range and span, accuracy and precision, reliability, calibration, hysterisis and dead zone, drift, sensitivity, threshold and resolution, repeatability and reproducibility, linearity, speed of response, fidelity and dynamic errors, overshoot. (b) Measurement of error - classification of errors, environmental errors, operational errors. (c) Transducers - active and passive, resistive, inductive, capacitive, piezo, resistive, thermo resultive, neperature, flow, humidity, displacement, velocity, force, strain, sound. (f) Specification, selection and application for pressure, temperature, flow, humidity, floplacement, flow, temperature, strain, miscellaneous. (g) Linits, fits, tolerances and gauges (h) Screw thread measurement (i) Surface finish measurement (ii) Surace finish measurement		and Power Generation	transmission and distribution
(c) Measuring instruments (d) DC motors (e) AC appliances (f) Utilisation of electrical energy (g) Electrical safety (e) Management process (f) Organisational Management (c) Human resource management (d) Material Management (e) Material Management (f) Hutrology and Instrumentation (a) Classification of instruments - range and span, accuracy and precision, reliability, calibration, hysterisis and dead zone, drift, sensitivity, threshold and resolution, repeatability and reproducibility, linearity, speed of response, fidelity and dynamic errors, overshoot. (b) Measurement of error - classification of errors, environmental errors, operational errors. (c) Transducers - active and passive, resistive, inductive, capacitive, piezo, resistive, thermo resultive, neperature, flow, humidity, displacement, velocity, force, strain, sound. (f) Specification, selection and application for pressure, temperature, flow, humidity, floplacement, flow, temperature, strain, miscellaneous. (g) Linits, fits, tolerances and gauges (h) Screw thread measurement (i) Surface finish measurement (ii) Surace finish measurement			(b) AC fundamentals
(d) DC motors (e) AC appliances (f) Utilisation of electrical energy (g) Electrical safety 11. Industrial Management (a) Management process (b) Organisational Management (c) Human resource management (d) Material Management (e) Adterial Management (f) Material Management (g) Electrical safety 11. Industrial Management (g) Metrology and Instrumentation (a) Classification of instruments - range and span, accuracy and precision, reliability, calibration, hysterisis and dead zone, drift, sensitivity, threshold and resolution, repeatability and reproducibility, alibration, hysterisis on errors, observation errors, signal transmission errors, observation errors, operational errors. (c) Transducers - active and passive, resistive, inductive, capacitive, piezo, resistive, inductive, capacitive, pi			
(e) AC appliances (f) Utilisation of electrical energy (g) Electrical safety 11. Industrial Management (a) Management process (b) Organisational Management (c) Human resource management (d) Material Management 12. Metrology and Instrumentation (a) Classification of instruments - range and span, accuracy and precision, reliability, calibration, hysterisis and dead zone, drift, sensitivity, threshold and resolution, repeatability and reproducibility, linearity, speed of response, fidelity and dynamic errors, overshoot. (b) Measurement of error-classification of errors, environmental errors, signal transmission errors, observation errors, operational errors. (c) Transducers- active and pasive, resistive, inductive, capacitive, piezo, flow, humidity, displacement, relocity, force, strain, sound. <th></th> <th></th> <th></th>			
(f) Utilisation of electrical energy (g) Electrical safety (a) Management process (b) Organisational Management (c) Human resource management (d) Material Management (a) Maragement process (d) Material Management (e) Puranagement (f) Classification of instruments - range and span, accuracy and precision, reliability, calibration, hysterisis and dead zone, drift, sensitivity, threshold and resolution, repeatability and reproducibility, ulinearity, speed of response, fidelity and dynamic errors, overshoot. (b) Measurement of error- classification of errors, environmental errors, signal transmission errors, observation errors, operational errors. (c) Transducers- active and passive, resistive, inductive, capacitive, piezo, resistive, inductive, capacitive,			
(g) Electrical safety 11. Industrial Management (a) Management process (b) Organisational Management (c) Human resource management (d) Material Management (a) Classification of instruments - range and span, accuracy and precision, reliability, calibration, hysterisis and dead zone, drift, sensitivity, threshold and resolution, repeatability and reproducibility, linearity, speed of response, fidelity and dynamic errors, overshoot. (b) Measurement of error- classification of errors, environmental errors, signal transmission errors, observation errors, operational errors. (c) Transducers : Classification of transducers - active and passive, resistive, inductive, capacitive, piezo, resistive, thermo resistive (d) Specification, selection and application for pressure, temperature, flow, humidity, displacement, velocity, force, strain, sound. (e) Construction and functioning of various machines 13. Construction and functioning of various machines (a) (d) Turbines (e) Iteriagenes (f) Pumps (h) Compressors (c) (g) Jurbines (h) Pumps (h) Compressors (c) (f) Purifier			
11. Industrial Management (a) Management process (b) Organisational Management (c) Human resource management (d) Material Management (e) Human resource management (d) Material Management (e) Human resource management (f) Material Management (a) Classification of instruments - range and span, accuracy and precision, reliability, calibration, hysterisis and dead zone, drift, sensitivity, threshold and resolution, repeatability and dreproducibility, linearity, speed of response, fidelity and dynamic errors, overshoot. (b) Measurement of error- classification of errors, environmental errors, signal transmission errors, observation errors, operational errors. (c) Transducers - active and passive, resistive, inductive, capacitive, piezo, resistive, inductive, capacitine, pioco, resistive, indu			
12. Metrology and Instrumentation (b) Organisational Management 12. Metrology and Instrumentation (a) Classification of instruments - range and span, accuracy and precision, reliability, calibration, hysterisis and dead zone, drift, sensitivity, threshold and resolution, repeatability and reproducibility, linearity, speed of response, fidelity and dynamic errors, overshoot. (b) Measurement of error- classification of errors, environmental errors, signal transmission errors, observation errors, operational errors. (c) Transducers - active and passive, resistive, inductive, capacitive, piezo, resistive, thermo resistive (d) Specification, selection and application for pressure, temperature, flow, humidity, displacement, velocity, force, strain, sound. (e) Construction and functioning of various machines (a) Pumps (b) Compressors (c) Turbines (e) IC Inside the addition of transducers and gauges (f) Measurement of displacement, flow, temperature, strain, miscellaneous. (g) Limits, fits, tolerances and gauges (f) Construction and functioning of various machines (a) (d) Turbines (e) (e) IC Engines (f) (f) Pumps (f)	11	Industrial Management	
12. Metrology and Instrumentation (c) Human resource management 12. Metrology and Instrumentation (a) Classification of instruments - range and span, accuracy and precision, reliability, calibration, hysterisis and dead zone, drift, sensitivity, threshold and resolution, repeatability and reproducibility, linearity, speed of response, fidelity and dynamic errors, overshoot. (b) Measurement of error- classification of errors, environmental errors, signal transmission errors, observation errors, operational errors. (c) Transducers - active and passive, resistive, inductive, capacitive, piezo, resistive, internetentive, flow, humidity, displacement, flow, temperature, strain, m	11.	industrial Management	
(d) Material Management 12. Metrology and Instrumentation (a) Classification of instruments - range and span, accuracy and precision, reliability, calibration, hysterisis and dead zone, drift, sensitivity, threshold and resolution, repeatability and reproducibility, linearity, speed of response, fidelity and dynamic errors, overshoot. (b) Measurement of error- classification of errors, environmental errors, signal transmission errors, observation errors, operational errors. (c) Transducers - active and passive, resistive, inductive, capacitive, piezo, resistive, thermo resistive (d) Specification, selection and application for pressure, temperature, flow, humidity, displacement, velocity, force, strain, sound. (e) Control Systems (f) Measurement of displacement, flow, temperature, strain, miscellaneous. (g) Limits, fits, tolerances and gauges (h) Screw thread measurement (i) Surface finish measurement (ii) Compressors (c) Boilers (d) Turbines (e) IC Engines (f) Purifiers and separators (g) Hydraulic machinery and lifting equipment etc			
12. Metrology and Instrumentation (a) Classification of instruments - range and span, accuracy and precision, reliability, calibration, hysterisis and dead zone, drift, sensitivity, threshold and resolution, repeatability and reproducibility, linearity, speed of response, fidelity and dynamic errors, overshoot. (b) Measurement of error- classification of errors, environmental errors, signal transmission errors, observation errors, operational errors. 1.	Basic electrical engineering	(a) Network theorems and laws(b) Magnetic circuits(c) AC fundamentals(d) RLC circuits
2.	Static and rotating AC&DC machines	 (a) DC generators (b) DC motors (c) Transformers (d) Synchronous generators (e) Synchronous motors (f) Induction motors (g) Single phase motors
3.	Power system	 (a) Generation of electrical power (b) Transmission and distribution (c) Circuit breakers (d) Cables
4.	Electrical measurements	 (a) Moving coil instruments (b) Moving iron instruments (c) Measurement of current, voltage, frequency and energy (d) Bridge circuits
5.	Semiconductor Devices	(a) Semiconductors(b) Diodes and power supplies(c) Transistors
6.	Basic Computer Applications	(a) Hardware and software(b) Operating systems and applications(c) Internet

1	Circuit Fundamentals	Passive Circuit elements, Ohm's Law, Energy Sources,
		DC and AC Fundamentals, Tuning Circuits and Filters, Electrostatics, Faraday's Laws and Lenz's laws
2	Solid State Physics	Conductors, Semiconductors and Insulators
3	Active and Passive Devices in circuits, Switching circuits	Resistors, Capacitors, Diodes, Special Diodes, Transistors, FET, Thyristors, DIAC,TRIAC, Optoelectronics Devices, IGBT, switching applications
4	Amplifiers and Oscillators	Single Stage and Multistage Amplifiers, Feedback amplifier, Sinusoidal and non-sinusoidal Oscillators
5	Integrated Circuits and Logic Gates	Basic gates and equivalent circuits, Adders, Subtractors, Op-Amp, Flip Flops
6	Transducers	Hall Effect, Classification/Types and working- LVDT, proximity sensors, piezoelectric transducers, working of Load cell
7	Electronic Instruments	Analog and Digital Instruments, Multimeter, Voltmeter, Ammeter, CRO
8	Power Supplies	Unregulated and Regulated Power Supply, Rectifiers, SMPS, UPS
9	Number Systems, Boolean Algebra	Decimal and Binary number systems- Conversion problems, Laws of Boolean Algebra
10	Digital Circuits and Microprocessors	Digital logic families:TTL, MOS, Combinational circuits: multiplexer/ demultiplexer, encoder/ decoder, adder/subtractor, comparator, counters and parity generators; Sequential circuits: latches and flip- flops (RS, JK, D, T, and Master Slave); Registers; Counters: ripple, ring, and shift register counters; PLC- working with sensor and actuators, PLC programming, Microprocessors: 8085 and 8086, Ladder Diagram, RAM, ROM, Choppers, Inverters and Cycloconverters.
11	Principles of Communication	Modulation and De-modulation types, FSK, PSK, TDMA, FDMA, CDMA. Electromagnetic Spectra, Basic principles of Fibre Optic communication
12	AV Systems	Microphones, Loudspeakers, Stereo system, Dolby system, Tuners, IF and RF Amplifiers, Digital TV, CCTV, Frequency, Phase and Amplitude Distortion, Mixers, audio-video formats
13	Ship Communication Equipments	GMDSS, marine VHF, RADAR, INMARSAT Equipment, Antennas in ship
14	Basic Electricals	AC and DC fundamentals, Basic working of AC and DC motors-classification, Transformers, AC/ DC motor speed control techniques, Basic working principle of Generators, Alternator, Rectifiers and invertors, Star and delta starters
15	Energy Conservation	Renewable sources of energy, VFD for industrial use
16	Basic Computer Applications	Hardware and software, Operating systems and applications, Internet

1	Surveying	Chain surveying – principles, instruments, ranging,
		and chaining survey lines, field work and field book, selection of survey stations, units of land
		area.
2	Levelling	Levelling instruments, different types, bench mark, reduced level of points, booking of field notes, reduction of levels by height of collimation method. Modern survey – instruments – Total station, Electronics theodolite.
3	Materials	Brick – varieties and strength, characteristics of
5	Materials	good brick. Cement –varieties and grade of cement and its uses. Steel – types of steel for reinforcement bars, steel structural sections. Aggregates – types & requirements of good aggregates. Concrete – grades of concrete as per IS code, water cement ratio, Workability, mixing, batching, compaction and curing.
4	Masonry	Classification-Stone masonry-Brick masonry-
		Laterite masonry–composite masonry. Different types of stone masonry-General principles and specifications for stone masonry.
5	Brick masonry	Different types of bonds for walls, piers and
	2	junctions of walls for equal and unequal thickness- English, Flemish (Single and Double Flemish)- Specification for brick masonry as per relevant codes. Hollow block masonry, Solid block masonry and inter locking block masonry. Types and methods of construction-Advantages and Disadvantages with reference to other types of masonry.
6	Damp proof courses	Definition of dampness-causes and effects-
		methods of prevention-surface treatment-
		internal/external water proofing courses.
7	Form work	Functions-materials used– Requirements of good form work–Scaffolding, Shoring Definition–purpose and function–Requirements-materials used
8	Plastering and Pointing	Materials and proportion–Functions–general
		specifications-types Different components of
		building from foundation to roof and their
		functions
9	Foundations	Functions, Classification, Shallow- Deep, Types- Spread footing-raft-mat-column footing-pile foundation-well foundation, bearing capacity.
10	Flooring	Requirements of a good floor, materials used for flooring, Floor finishes–Types Mosaic, Marble, Granite, Ceramic tiles, Vitrified tiles, Glass, Wooden, and other types of modern floor finishes
11	Simple stresses and strains	Types of stresses–Elasticity–Hook's law–Young's modulus–Elasticity, stiffness, plasticity, toughness, brittleness, ductility, Malleability and hardness– Linear strain and lateral strain–Poisson's ratio- volumetric strain–Bulk modulus–modulus of rigidity
